

Biodegradability at V&C

The infill chips and cardboard boxes we use at V&C are 100% biodegradable. The woodwool used in our hampers is 100% biodegradable, pesticide-free and from Swedish sustainable tree-farms.

100% of all our glass is recycled.

100% of all our cardboard and paper is recycled.

100% of all our food waste is recycled.

A programme of re-lamping to low energy lighting is in process in all our locations.

A small but growing number of the producers we buy from are moving towards a carbon neutral status.
