

*...yesteryear*

*"My love, don't cry if I go away, I leave the paddy-field behind, I will come back home..."*

*(rice weeder song)*

... since 1904 Tenuta Margherita has produced the best varieties of Italian rice.

Its cultivation area covers around 250 hectares in the Desana countryside and surroundings, a few kilometres from Vercelli, an area that has always been dedicated to cultivating high quality Italian rice.

Tenuta Margherita is a piece of the history of the Vercelli plain, a land of water, rice, fog and herons. The family business takes care of the whole production process, from cultivation in the paddy-field, to rice drying and, processing in the company rice mill with bleaching stones, up to packing. Guaranteeing that the product is checked in all the phases of the production process is fundamental.
